Subject: Draft Numeric Nutrient Criteria for Lake

Gentlemen,

As referenced at the Missouri Clean Water Commission meeting yesterday, the department has developed draft numeric nutrient criteria for lakes that are ready for distribution and discussion. The department believes the revised criteria address the concerns and comments contained in EPA's disapproval from August 2011. Specifically, the revised criteria provide a link between the criteria and designated uses. Where multiple designated uses exist, the most protective and sensitive use is the driving factor toward attainment goals. Attached are a draft nutrient criteria rationale document and accompanying data and calculations for your review.

If you have questions or would like to schedule a meeting to discuss, please let me know.
Thank you

John Hoke
Chief, Watershed Protection Section
Water Protection Program
Missouri Department of Natural Resources
P: 573-526-1446, F: 573-526-6802
